like a top of the range, high performance car. Lisa P marked it as to-read Aug 31, Less good genes. I cannot fault any of it as again it has been based on her personal experiences which to my mind is paramount when advising others who struggle with these things. She also gives advice on finding the right breeder, discussing both farm and pedigree breeders, and what to look for when visiting potential puppies, in terms of the puppies themselves and the mother and father. The upside of this kind of brain design is that it gives you superb levels of response from your dog in everyday training or competition. No trivia or quizzes yet. It has often been said that the Border Collie is the breed that has it all — brains and beauty. Carol has achieved that edge admirably. They also all have a right to be challenged. She has four amazing dogs, that all have individual personalities. He and his brother have always had long walks and swims — they are collies. Price looks at the influence of genetics, genetic priorities and faults, health factors, pedigree and non-pedigree Collies as well as introducing us to the different governing bodies.
